EXECUTIVE PROFILE

Turning ambiguous technical risk into executable decisions.

Founder-operator, CTO, Technology Director and Principal Architect with hands-on depth. I work across strategy, portfolio, pre-sales, architecture, delivery, resilience and governance when a platform matters and the organization needs a route it can sustain.

SCOPE

Core responsibilities

Strategy
Roadmaps, portfolio, prioritization, P&L, pricing and pre-sales.

Architecture
Enterprise and solution architecture across AWS, Azure, integration and data platforms.

Risk
Cyber governance, incident readiness, continuity, privacy and secure delivery.

Execution
Teams, partners, quality gates, releases, runbooks and operating cadence.

EVIDENCE

Selected impact

From founder-led delivery to a measurable operating model
Processes, KPIs, evidence and operating reviews that made delivery more repeatable without turning a small team into a bureaucracy.

Restore first, modernize second
Controlled recovery of legacy applications: containment, a clean environment, protected publishing, selective restoration and an explicit modernization map.

From isolated controls to a governable cybersecurity program
A vCISO-style operating model with a risk register, owners, policies, executive metrics, incident readiness and a 30/60/90 roadmap.

Modernize by capability without betting everything on replacement
A progressive route for a legacy platform using capability boundaries, contracts, single-writer ownership, reversible releases and cross-boundary observability.

CAREER PROGRESSION

Increasing decision scope, not a technology inventory.

01	VELTRIX · Co-CEO & Director of Technology · 2025–Present Co-lead technology for a multidisciplinary LegalTech/RegTech organization, translating legal, compliance and privacy requirements into secure, auditable systems and controlled AI-assisted workflows.
02	VERTROTEK · Founder & CEO Technology Director & Principal Architect · 2023–Present Own strategy, P&L, portfolio, pricing, pre-sales and executive delivery oversight across cybersecurity, cloud modernization, data/AI and automation programs.
03	PEICH · Chief Technology Officer · 2021–2023 Set strategy, architecture, delivery processes and operating standards across an HR software product and a consulting practice.
04	EUREKA DATA INNOVATION / GRUPO IMAGEN · Cloud & Data Architect · 2020–2021 Designed AWS cloud and data platforms with availability, security, operability, cost discipline, analytics and observability in scope.
05	EUREKA DATA INNOVATION · Co-Founder & Solutions Architect · 2018–2020 Built the data/cloud practice, led one project manager and four developers and helped the organization achieve CMMI Level 3 in 2020.
06	4TOANGULO · Business Unit Director & Architect · 2015–2018 Helped launch and lead an ERP practice, connecting consultative sales, feasibility, solution architecture, implementation and cloud operations.
07	EPICOR SOFTWARE CORPORATION · Developer & Technical Lead · 2011–2015 Built enterprise ERP capabilities for global customers and provided technical leadership across analysis, design, implementation and customer-facing problem solving.

EDUCATION Mechatronics Engineering Bachelor's Degree · Universidad Autónoma de Nuevo León (UANL).	CREDENTIALS Quality and data foundations Certified CMMI Associate · Stibo Systems MDM Solution Fundamentals.	TECHNOLOGY ENVIRONMENT Cloud · Cyber · Data · Enterprise applications AWS · Azure · NIST CSF · CIS Controls · ISO 27001 readiness · incident response · data platforms · analytics · secure delivery · legacy modernization.
